7/22/2013

Geno,

We have just taken our 2013 sludge survey at Southwood Farm. It is now seven months after the use of the sludge boat and application of your suite of biological products.

I am pleased to tell you that the lagoon sludge level fell from 4.1 feet of sludge in 2012 to 2.7 feet of sludge in 2013, a reduction of 3,600,000. If this had been pumped and hauled, at 2 cents per gallon it would have cost \$72,000!

We have noticed improved operation in regards to recycle/flush, and irrigation.

Best Regards,

Stephen Coles,
